Installation News:

Dynacord Makes Waves On Board Stena Cruise Cinema.

Saville Audio Visual recently installed a state of the art Dynacord surround-sound system in to a custom built, 100 seat cinema on board a Stena Cruise Ferry. Savilles, one of the UK's leading AV integrators, in conjunction with POLARaudio specified five Dynacord D-Lite D8 speakers, a Dynacord active D-Lite PowerSub 312, a Biamp MCA8150 multi-channel amplifier and a Violet Audio ADP61 processor for this unusual installation on board the Stena ship.

The brief was to supply a system that would provide high quality sound for up to one hundred passengers. The system needed to be loud whilst retaining clarity, a quality that is an attribute of all Dynacord's speakers.

Utilising the unique voicing of the D8 D-Lite Speakers, Savilles were able to install a high quality audio system within the constraints of the customer's budget.

The Violet Audio ADP61 Studio AV Preamp Decoder was installed to process the surround-sound before being fed to the Biamp MCA8150 8 channel amplifier. The MCA8150 delivers 150Watt per channel into 4 ohms, which powered the 250Watt, two-way D-Lite D8's. The D8's were complimented by the PowerSub 312 active 12" subwoofer, equipped with an integrated three-channel power amplifier with a total output of 1300Watts. The unusual decision to install an active sub was taken as the PowerSub 312 offered the best size, weight and audio performance and allowed the subwoofer to be sited anywhere in the room.

Polar Audio is a supplier of intelligent audio solutions and has exclusive UK distribution for leading brands including ASL, Australian Monitor, Aviom, beyerdynamic, Biamp, Blue Sky, Cue, Dynacord, GK, MC² Audio, Novasonar, Renkus-Heinz, Revolabs, WHD and XTA. They offer a host of professional services including system design, product integration, project logistics and programming assistance in addition to the marketing and sales of the brands they represent.
