

The World's Finest Wireless Systems

Press Release

Trantec Invite you to ProLight & Sound 2010

The Trantec team are delighted to announce their forthcoming presence at ProLight and sound 2010 and look forward to welcoming you on their stand (Hall 8.0, Stand F46) where they will be showcasing their extensive wireless portfolio.

ProLight and Sound is a four day event held at the Messe Frankfurt between the 24th and 27th March 2010, and is the largest Pro Light & Sound Exhibition in Europe.

The focus for this year's show will be on the Channel 38 ready, S6 wireless system which builds on the success of the S6000 range, taking the 19", 8-way concept to a higher level. Trantec has now incorporated a comprehensive user interface on the front panel allowing the user to configure and monitor all channels, with or without an external PC. Based on Trantec's award-winning technology, the internal circuitry of the S6 belt-pack and handheld transmitter has been redesigned and upgraded, extending the frequency capability to a massive 80MHz.

Trantec will also be exhibiting S-D7000 – the world's first professional fully digital wireless microphone system that is already in use at GMTV for their presenters and guests. Features include 24 bit audio resolution, network monitoring for over 60 channels, and you can now benefit from over 20 user channels in an 8MHz TV band!

Other products on show include, the S5.3 system, packed with a powerful set of features, the S5.3 offers 12 channels of pure value for money, the S5.5, 24 channel system which is available 'Racked'n'Ready', the S4.4 entry level system featuring four licence-free channels and the S4.16, a 16-channel version incorporating many additional features, also available in 'Racked'n'Ready' versions.

To make an appointment to visit a member of the Trantec team at this year's ProLight and Sound, contact Mark Parkhouse on 020 8330 3111 or email: mark@trantec.co.uk.

We look forward to seeing you there!
